Jaxon O'Flynn

jaxoflynn101106@gmail.com | San Diego, CA | (858) 922-6039

EDUCATION

Western Washington University *Intended Major: Data Science* | GPA: ? 2026-2029
Willamette University *Intended Majors: Data Science & Psychology | GPA: 3.88/4.0* *2025-2026*
Canyon Crest Academy *High School| GPA: 3.65/4.0* *2021-2025*

Relevant Coursework: Cognition, Inferential Statistics with R, Introduction to Programming with Python, and Calculus and Analytic Geometry I

Certifications/Licenses: Adolescent Mental Health Crisis Response, Driver's License

Awards: WWU Honors College, WWU Computer Science Scholars Program

SKILLS

- **Computer:** Experience with R, Python, and jsPsych
- **Software:** Windows

RESEARCH EXPERIENCE

Research Assistant, *Mentorship with Janna Wennberg, UC San Diego* *July 2026 - September 2026*

- Created practice trials using JsPsych for a working memory task that tested participants with stimulus and corresponding keyboard keys.
- Followed JsPsych tutorials by Martin Zettersten that explained some of the basics of HTML structure, how to use timeline variables and customize plugins, and creating trials and feedback.
- Analyzed the research paper: "The Working Memory Stroop Effect: When Internal Representations Clash With External Stimuli" (Kiyonaga & Egner 2014) using the QALMRI method.
- Completed a reproducibility exercise using Kiyonaga & Egner's data to conduct a two sample paired t-test to determine whether there was a significant difference between congruent vs noncongruent trials.

Neuroscience Intern, *Youth Mental Health Academy, Child Mind Institute* *July 2025 - August 2025*

- Created an informative capstone project aimed to help parents understand their adolescent's brain, healthy coping mechanisms, and the importance of prioritizing mental health.
- Met via Zoom five times a week to learn about neuroscience topics and worked with the capstone team.
- Explored career options and specializations within the neuroscience field through seminar talks.

Psychology Intern, *Youth Mental Health Academy, Child Mind Institute* *July 2024 - August 2024*

- Created a capstone project about examining how brain chemistry differs in individuals with schizophrenia and how schizophrenia symptoms physically manifest.
- Engaged with the program's focus of bridging the gap between structurally marginalized communities through classroom-style discussion and research.
- Learned about cranial nerves, brain anatomy, and developed a deeper understanding about mental disorders.

PROJECTS

Categorical and Numeric Data Mini-Projects, *Inferential Statistics with R, WU February 2026 - May 2026*

- Used a "split-apply-combine" method to delegate tasks among group members to each ask a question of interest pertaining to mental health and screen time usage.
- Utilized visualization techniques to graph the distribution of a dataset and conducted statistical tests based

on question of interest.
- Included a final-deliverable in the form of an interactive data display that allowed peers to learn about our project in a fun, engaging way.

Enigma Project, *Intro to Programming with Python, Willamette University* *April 2026 - April 2026*
- Coded modified version simulation of Enigma machine through guided instruction.
- Utilized class functions to store attributes and functions of the enigma machine in two separate classes: the enigma model and enigma rotors.
- Learned and worked with established constants and enigma view, which displayed the machine to the user.

Final Project, *Intro to Data Science with R, Willamette University* *September 2025 - December 2025*
- Worked throughout the semester with a partner to research, create, and present a project about examining associations between variables relating to volleyball game performance.
- Used the data science process to develop a question of interest, conduct an appropriate statistical test, visualize results, and formulate a conclusion.
- Presented findings including the processes of our hypotheses test and the caveats and areas of further exploration.

PRESENTATIONS
- May 2026 “Jeopardy: Social Media and Addiction” Presented in Inferential Statistics with R as a final deliverable interactive game for instructors and peers.
- December 2025 “Examining Relationships in Volleyball Performance.” Presented in Intro to Data Science with R as a final presentation for instructor and peers.
- August 2025 “The Adolescent Brain: Coping Mechanisms.” Presented via Zoom for a capstone project for Youth Mental Health Academy to YMHA directors, faculty, and peers.
- August 2024 “How Brain Chemistry Affects an Individual with Schizophrenia Emotionally and Socially.” Presented as a capstone project for Youth Mental Health Academy to YMHA directors, faculty, and peers.

OTHER EXPERIENCE
Barista, *Starbucks, San Diego, CA* *May 2024 - February 2025*
- Prepared handcrafted beverages and provided excellent customer service in a high-volume setting.
- Handled cash, POS systems, and managed daily transactions with accuracy.
- Maintained a clean, sanitary work environment and adhered to food safety standards.
- Worked alongside with team members to ensure efficient operations and customer connection.

Courtesy Clerk, *Pavilions, San Diego, CA* *October 2022-February 2024*
- Worked in the front end to help customers find what they're looking for and to bag their groceries.
- Responsible for training several new courtesy clerks on all aspects of the position.
- Using time management and working alongside other associates ensured tasks were completed efficiently and thoroughly.
